ABOUT ME

Professional, 22 years old, currently pursuing a degree in Systems Analysis and Development in the 1st semester at FIAP. Graduated as a Web Java Programmer from Instituto PROA and Full Stack Developer from Trybe. I emphasize my skills in agile methodologies, time management, teamwork, and problem-solving. I am excited to find opportunities that allow me to apply and improve my skills.

EXPERIENCE

MONTREAL INFORMÁTICA | 03/24 - PRESENT
SYSTEMS DEVELOPMENT INTERN

Internship in the Front-end Systems Development area, working on internal projects and/or for clients, using languages such as JavaScript, TypeScript, Angular 10+, React, .NET Core, Node.js, in addition to performing unit tests and using Docker.

DROGARIA SÃO PAULO | 11/20 - 07/21
PHARMACY ATTENDANT

Maintained store organization and cleanliness, ensuring a pleasant environment for customers. Responsible for monitoring the expiration dates of products available for sale, and attended customers at the checkout and counter, including handling controlled medical prescriptions.

PROJECTS

GERMINNE - TECH LEAD AND FULL STACK DEVELOPER

Germinne is a platform that uses technologies such as HTML, CSS, JavaScript, and React to democratize urban agriculture, facilitating the cultivation of gardens for people of all experience levels and space availability. It incorporates libraries such as Axios, Formspree, Swiper, and MDB React UI Kit to enhance user experience, focusing on system efficiency and interactivity.

CASE PSEL XP INC

The application simulates a brokerage environment for stock investments. After registering or logging in, the user receives an authorization token to access functionalities related to stocks and the client account. This project was developed as part of a selection process for XP Inc. and consists of a RESTful API to simulate a stock buying and selling system, using Node.js, Express and a dockerized environment.
